

ONE BETTER AID SCORECARDS

The ONE Campaign's Better Aid Scorecards assess 21 donors on how much and how well they spend development assistance in the fight against extreme poverty.

10th

CANADA

RECOMMENDATIONS

- Canada should embark on a path of increasing its ODA from its current level of 0.28% of GNI to at least the average of other rich countries. Although Canadian aid is mostly well spent and well targeted, the country is operating below its potential by underspending.
- Aid will have the most impact if it is spent where it is most needed; therefore, Canada should strive to increase the share spent on the poorest countries from 36% to at least 50%.

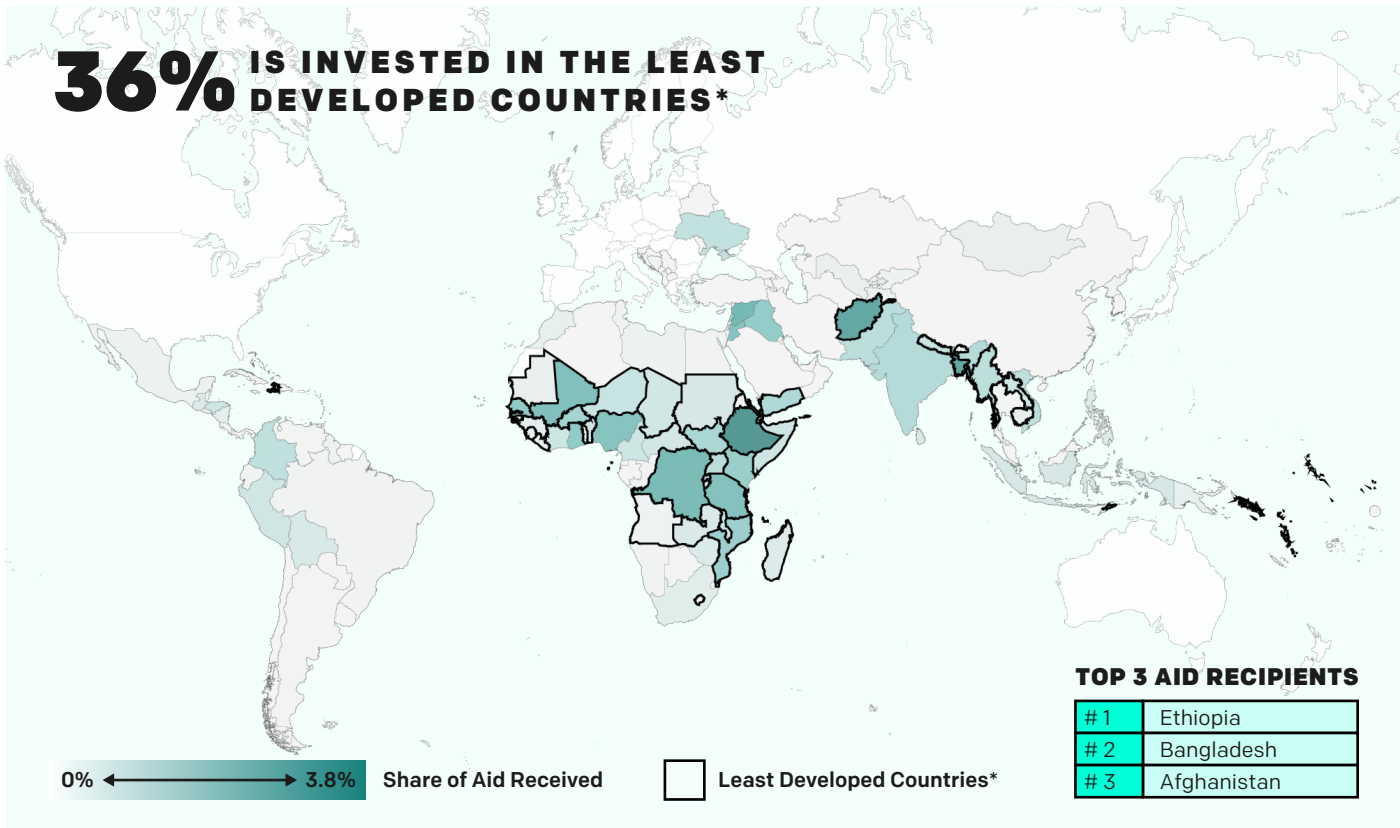

HOW ARE COUNTRIES SCORED?

The Better Aid Scorecards rank the 20 largest bilateral OECD DAC donors, plus the European Institutions. Donor performance is assessed using a 'distance to target' approach, which looks at the distance travelled by a donor towards the different objectives, which are based on international commitments or policy targets set by ONE. Distances are expressed as the percentage of the target already achieved (ranging from 0% to 100%).

For each of the three pillars (aid quantity, targeting and quality), scores are an average of their respective indicators (equally weighted). These scores are used to rank donors for each pillar. The overall ranking is produced by assigning half of the weight to how much donors spend (50% for aid volume) and the other half to how well they spend their ODA (25% for aid targeting and 25% for aid quality). For a full description of the methodology, and to compare donors, visit: one.org/scorecards.

ONE BETTER AID SCORECARDS

WHERE IS CANADA INVESTING ITS AID?

*A UN list of 47 countries with a low level of socio-economic development, characterised by weak human and institutional capacities, low and unequally distributed income and scarcity of financial resources.
