

## BETTER AID SCORECARDS

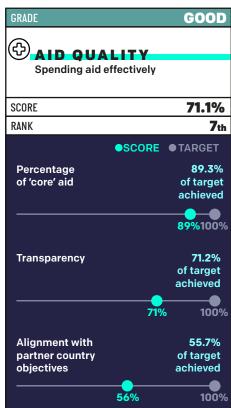

The ONE Campaign's Better Aid Scorecards assess 21 donors on how much and how well they spend development assistance in the fight against extreme poverty.

# NETHERLANDS

#### RECOMMENDATIONS

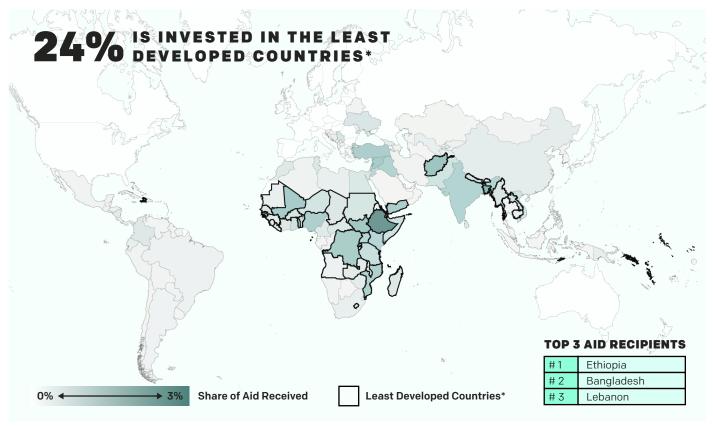

- Ahead of elections in 2021, all parties should publish time-bound commitments on returning Dutch ODA to 0.7% ODA/GNI and pledge to prioritise development cooperation in coalition negotiations.
- The Netherlands should take steps to improve the targeting of Dutch aid, in particular by increasing the proportion allocated to the Least Developed Countries and to social sectors.
- In negotiations on the priorities for the EU's future aid budget in the Neighbourhood Development and International Cooperation Instrument, the Netherlands should support the inclusion of legally binding targets on gender, human development and the Least Developed Countries in order to guarantee the quality of EU aid. Given that the deal reached by EU leaders on the EU's 7-year budget set out deep cuts to EU development spending, maximising the quality and impact of the aid budget is more important than ever.

### **HOW ARE COUNTRIES SCORED?**

The Better Aid Scorecards rank the 20 largest bilateral OECD DAC donors, plus the European Institutions. Donor performance is assessed using a 'distance to target' approach, which looks at the distance travelled by a donor towards the different objectives, which are based on international commitments or policy targets set by ONE. Distances are expressed as the percentage of the target already achieved (ranging from 0% to 100%).

For each of the three pillars (aid quantity, targeting and quality), scores are an average of their respective indicators (equally weighted). These scores are used to rank donors for each pillar. The overall ranking is produced by assigning half of the weight to how much donors spend (50% for aid volume) and the other half to how well they spend their ODA (25% for aid targeting and 25% for aid quality). For a full description of the methodology, and to compare donors, visit: **one.org/scorecards**.

### WHERE IS THE NETHERLANDS INVESTING ITS AID?

<sup>\*</sup>A UN list of 47 countries with a low level of socio-economic development, characterised by weak human and institutional capacities, low and unequally distributed income and scarcity of financial resources.
